

I just wanted to state that SOMETHING has to be done about telemarketers. A few weeks ago someone called me and I told him that I was on the State of IN No Call list and I would appreciate him taking me off their list. He informed me that he wasn't calling from IN and that that list did not apply to him, again I told him I'd appreciate it if he would take me off his call list, and he said no, he'd call as often as he likes. I then asked for his phone # and he said I'd be happy to give you my number> It's 1(800)F--K YOU only he said the words, not spelled them, and then he hung up on me. I realize there are people who make a living making telemarketing calls, but how did those same people make a living before they invented telemarketing? Please, there must be some rules made on a Federal level governing these issues.
